## **PREFACE**

**ASSALAMU'ALAIKUM WR. WB.**

Thank you, for supporting activities in producing books that I have done over 8 years. ALAHAMDULILLAHIROBBILALAMIN. I can finish 99 books till 2003 to 2011 for producing and to 2012 for publishing, so it is 9 years. This is the 99th book, as a necklace in information system in health especially in hospital information system.

This book can be used as process to understand about information system that related to hospital, very special in Hospital Information System. Begin with:

- 1) Data Warehouse;
- 2) Networking;
- 3) Wireless.

As a basic for more application in Hospital Information System relate to data collecting and keep in hospital as important resources.

Follow by:

- 1) Business Significant;
- 2) E-Commerce;
- 3) Electronic Medical Record;
- 4) Technology for services.

Materials are used as same aspects of implementation in hospital. Material can be used as supporting for many hospital activities and to improve hospital performance.

For closing the book, about Master Plan of Information System is important to develop information system in hospital, I hope can be increase benefit for hospital and for hospital process to improve health for patients.

Again, thank you for every one that help me to finish this book, and I hope can be follow by next books, in period that begin in 2012 after all of 99 books have publish.

**WASSALAMU'ALAIKUM WR. WB.**
